Errors

When you interact with the Authtion server, you may encounter three types of errors:

1. Spring server error, which look like this:

```
{
   status: HTTP status code,
   error: error-code,
   message: some text
}
```

2. OAuth2 server error, which look like this:

```
{
   status: HTTP status code,
   error:
    {
      error: error-code,
      error_description: some text
    }
}
```

3. Authtion server error, which look like this:

```
{
   success     : false,
   error-codes : [error codes list]
}
```
